**OUR MISSION**

Durable equipment. Practical engineering.
Reliable factory service.

ENGINEERING, SUPPLY AND SUPPORT

Core Advantages

01 Tracked mobility

Heavy-duty crawler tracks support traction on mud, gravel, orchards and demanding slopes.

02 Remote operation

Long-range control helps the operator work away from flying debris and steep terrain.

03 Commercial output

Cutting widths from 550 to 1200 mm cover compact turf work through wide-area clearing.

04 Factory support

Direct supply, OEM cooperation, spare-parts support and export documentation for global buyers.

Certification & Market Compliance

Compliance configurations are available for different export markets. Final certification and engine configuration are confirmed by model and destination.

ONE PLATFORM, MULTIPLE JOBS

Application Scenarios

Solar farms

Low-profile remote mowing beneath and between solar arrays while the operator remains at a safer distance.

Orchards & vineyards

Tracked mobility and compact access for vegetation control between rows and around trees.

Slopes & embankments

Remote operation for steep, rough and difficult terrain where conventional ride-on equipment is less suitable.

24V AND 48V TRACKED MOWERS

Gasoline Series

Gasoline power for versatile commercial mowing. Available in 24V and 48V control systems with 800, 1000 and 1200 mm cutting widths.
